

Aletheia Academy

Course List and Description

2022/23 Academic Year

Introduction to Learning Levels

Grammar Level Learning - Ages 6-9

This is a come and enjoy program. Parents will not need to purchase much (if any) additional curriculum, and it will not involve much work outside of class time. Meaningful participation will likely involve practicing memory work at home, and there may be projects that can be worked on outside of Aletheia. An example of this might be a writing project for the writing class, memorization of a poem or scripture for a Poetry Tea Party, or completing a special project or artwork at home. We hope to reinforce basic knowledge and practice foundational skills together in our time at co-op. The time at Aletheia should be viewed as “the cherry on top” of the home education that parents are doing.

Dialectic Level Learning - Ages 10-13

Classes at this level will require some more work outside of Aletheia. Families that desire to take classes in the dialectic level will likely need to buy some common curriculum and follow a common schedule through it so that participation in class will be meaningful and on the same page. We plan to continue honing in memory work and foundational knowledge, while practicing together the art of thought, speaking, and writing. Students who have not mastered spelling, grammar, writing, and even reading well, can still grow in these skills while learning the application of the knowledge they’ve gained in the grammar level.

Rhetoric Level Learning - Ages 14-18

Families choosing to cooperate in courses at this level will be engaging in even more robust content that will require parental teaching and student learning throughout the week. Again, a common curriculum will be worked through on a common schedule to enable families to learn together. Parents will teach students through material throughout the week, and tutors will reinforce content and answer questions on co-op days. Tutors will also likely provide quizzes, tests, or assignments as the content requires to help parents and students assess student progress in the material. These things will make it easy for parents to demonstrate “high school” transcript credits and a grade if they so desire. Students will need to be prepared to be thoughtful, have a high level of application of basic skills, and conduct themselves in personal time management.

This will require families buying books, curriculum, and required supplies that apply to each course they choose to take. For example, the program we use for Humanities will require a subscription to the program where honors level lectures can be viewed, purchase of a workbook, and corresponding literature. Most of our rhetoric level courses are integrative, combining knowledge from more than one specific subject area as is common in classical education.

Grammar Level

Age 6-9

Bible/Theology

Course Title: Journey Through the Bible

Tutor: Meadows

Course Length: Full Year

Course Description:

In this class students will be immersed in the overarching narrative of the Bible. We will focus on the themes of creation, fall, redemption, glory as we study the Word of God. Children will be introduced to the basic doctrines of the faith and we will work on committing both catechism and scripture to memory. We will learn how to pray and to sing songs that have been sung for centuries. With any remaining time we will see how God orders our day with season, the elements of the calendar, and work on basic knowledge like skip counting. In all of it we seek to help our grammar students to “glorify God and enjoy him forever!”

English/Grammar/Writing

Course Title: Intro to English

Tutor: Nikki Thiessen

Course Length: Full Year

Course Description:

This class combines grammar and writing studies with the gathered class times shifting between the two disciplines each week. In this class we will dissect the power of words. This grammar study will include the study of parts of speech, common sentence patterns, how to form sentences, and sentence diagramming. The goal of grammar studies is both a clearer understanding of our own language as well as the foundation of foreign language studies. Additionally students will be given the tools to read and understand their Bibles more fully.

Additionally, students will seek to apply the grammar skills they have learned to their own writing. We will learn the basics of writing short stories and essays. Moving between research based and creative writing, students will have the opportunity to read, research, retell, and create their own original stories and essays based on historical fables, myths, & fairy tales. Parents will fine-tune assignments to suit the writing level of their children and communicate with the tutor about each student's writing level.

Course Curriculum or Books:

Fine Arts

Course Title: Introductory Logic

Tutor: Tom Thiessen

Course Length: Full Year

Course Description:

This introduction to formal logic introduces students to the basic tools of reasoning which undergird all thinking. It begins to teach them how to reason well and how to discern truth in the reasoning of others. It does all of this from a robust Christian worldview, showing how logic is rooted in God himself, teaching them to think about truth as Christians and to marvel at God's brilliant mind and how it is reflected in human reason.
